

Hljóðkerfisvitund

Fyrsta hljóð í orði.

Hér erum við að tengja myndir við réttan bókstaf.

Hugmyndir að útfærslu:

Bingó:

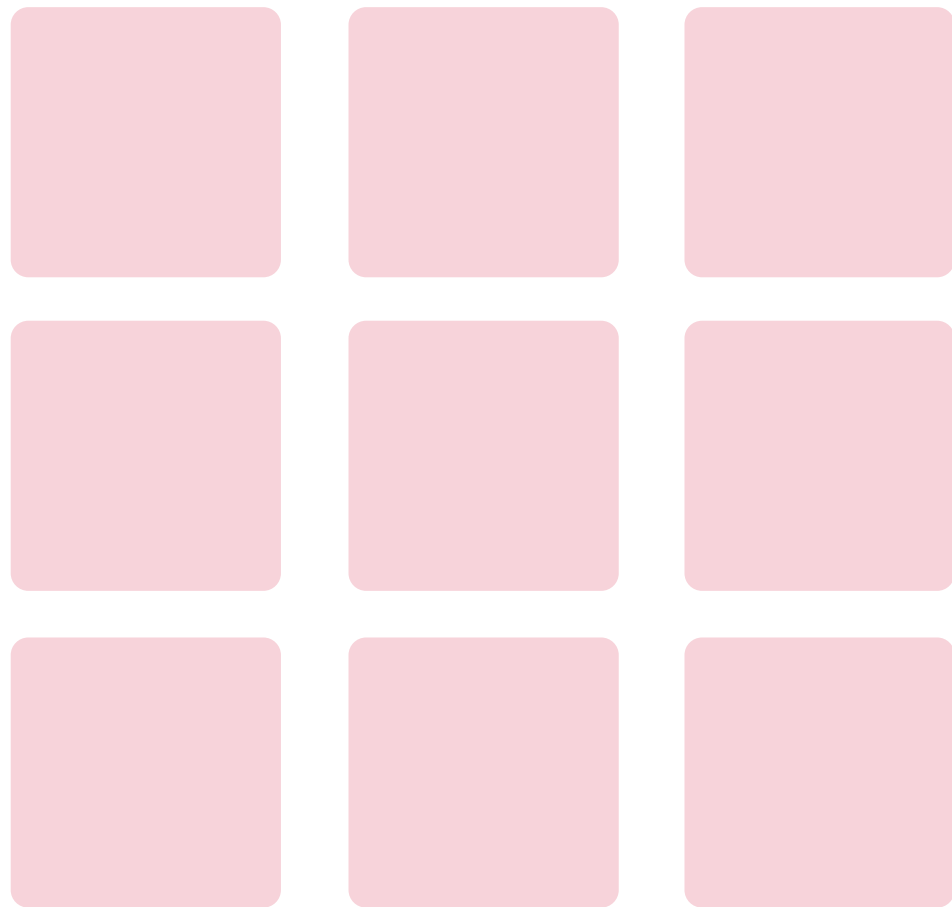

Nemendur fá spjald með bókstaf – bingóstjóri dregur eina mynd í einu og sá sem er bókstafinn sem passar við myndina leggur myndina yfir fering.

Sá sem er fyrstur að fylla spjaldið sitt vinnur.

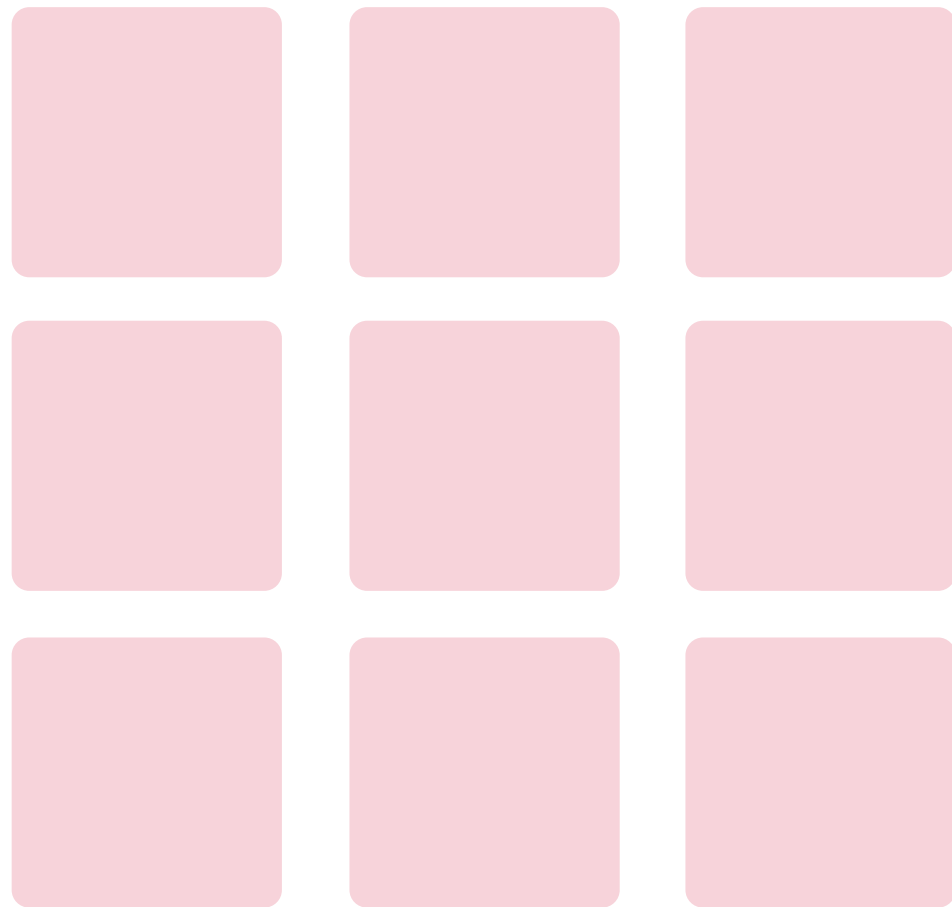

Greina á milli líkra bókstafa:

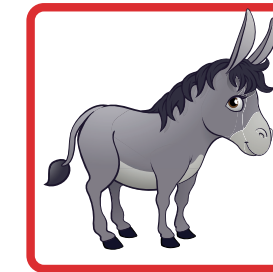

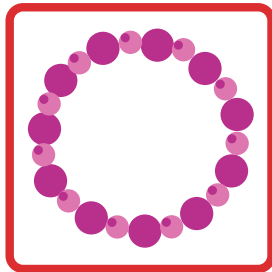

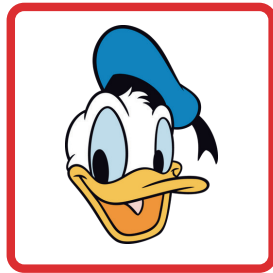

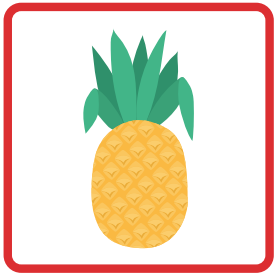

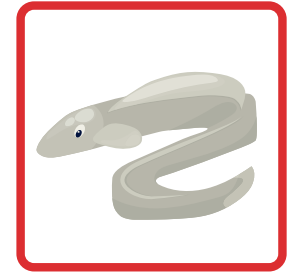

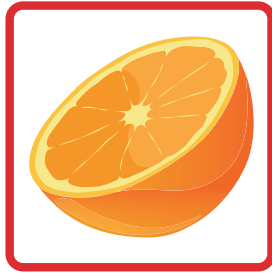

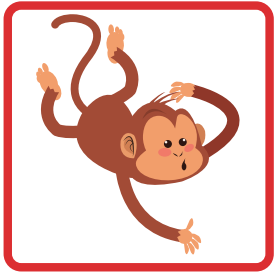

Nemandi er með tvö spjöld, t.d. o og ó, kennari dregur mynd, segir orðið og nemandi leggur myndina á það spjald sem hefur rétt hljóð.
