

Vélmenni

Byrjið á að klippa spjöldin út og plasta þau.

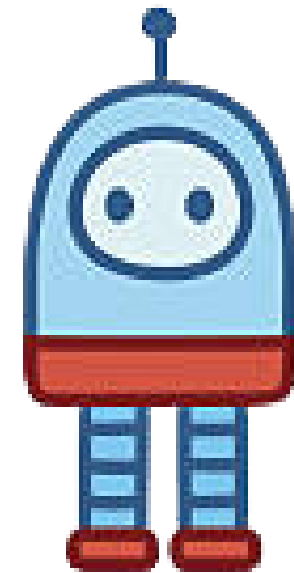

Hugmyndir að notkun:

Nemendur raða spilunum með bakhliðina upp og skiptast á að snúa tveimur við. Ef tölurnar tvær mynda töluna 10 þá hefur nemandinn fengið slag.

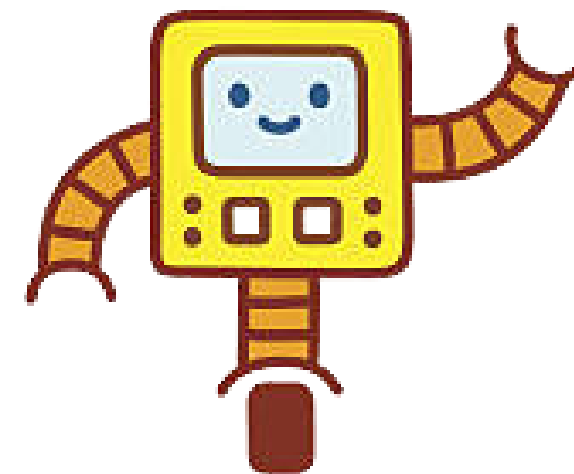

Það er einnig hægt að nýta spjöldin til að tengja saman 10 vini án þess að bakhliðin snúi upp fyrst.
